KEYNOTES - LIVE and VIRTUAL

Harnessing the Hurricane: Adapting Faster to Extreme Change

Change is constant, unpredictable and accelerating. Extreme change can – much like a hurricane – leave you dizzy, dazed and disoriented, as though the earth is moving under your feet. Even if you survive the storm, you know more is coming. Change expert Dr. Mark DeVolder throws a lifeline to you and your team with tools and strategies he's developed to clear away the fog. You will learn how to rewire your brain to bounce through adversity, overcome obstacles and reinvent yourself. Mark's cutting-edge principles will enable you to adapt boldly, nimbly and quickly in midst of constant change.

Unstoppable Resilience: Developing the Mindset of a Champion

Why doesn't the fastest runner always win the race? Or why doesn't the smartest person always get the best job? It takes more than natural speed, intelligence or ability to be a champion. It takes resilience. Mark shows leaders how to increase their grit, passion and purpose by developing the mindset of a champion. Mark's best practices will help you cultivate determination, increase resilience and conquer adversity.

PIVOT: How to Navigate through Transitions

This is not a keynote about the competitive advantages of change; it's about HOW to Pivot during change. Developed in the COVID-19 trenches, Mark shows leaders how to navigate the stages of transition. Deeply practical, leaders will learn how to walk through the door of uncertainty into the future. Mark demystifies the stages of transition and arms leaders with tools to do the work that must be done in order to be successful.
